Beauty*

To the Wahl Dealer

It is with a feeling of pride that we present to you the 1925 line of Wahl Products—New Perfected Wahl Eversharps, Wahl Pens and Red Top Eversharp leads. On the pages of this book is illustrated not only the most complete, but the finest line of high grade writing instruments we have yet produced.

The introduction, this year, of the New Perfected Wahl Eversharp marks a distinct epoch in the history of writing implement progress. It has been placed on the market only after years of scientific research and experimentation on the part of our engineering staff. It is really the "trouble proof" pencil.

Six new features, added refinements, make the New Wahl Eversharp the finest pencil made. It is not only easier and faster in operation, but is free from any tendency to clogging or faulty operation of any kind. So strong is our confidence in this new pencil that we print the following broad guarantee in our national advertising:—

"The New Perfected Eversharp is unconditionally guaranteed against faulty operation of any kind, from any cause. All dealers are authorized to replace free of charge any part that fails to work to your entire satisfaction."

Eversharp's "write-hand companion," Wahl Pen, is becoming more popular with the public every day. The fountain pen user recognizes quickly the superiority of this fine line of pens. The increase in volume of our metal pen business is particularly gratifying. People everywhere are realizing the logic and good sense behind the idea of gold or silver for pen barrels. The Wahl all-metal pen combines beauty, utility and indestructibility in high degree.

You are urged to study the pages of this book carefully and familiarize yourself with the wide range of styles and sizes of Wahl Products which you are able to offer your trade. By so doing you can give expert advice to your customers in the selection of the items best suited to the desire and needs of the individual.

We are grateful to each of our dealer-friends for the co-operation which has made the present development of this business possible, and to assure each one of our loyal support and service.

THE WAHL COMPANY.

The Home of Wahl Pens and Eversharp Pencils

THIS spacious daylight factory is devoted exclusively to the manufacture of Wahl Eversharp pencils, Wahl Pens and Eversharp leads.

It is a thoroughly modern fireproof building, five stories high, with seven acres of floor space. The first four floors are occupied by the manufacturing departments, and the fifth floor houses the executive, sales and general offices.

All the equipment in the Wahl plant is the finest that human ingenuity has ever devised for building quality writing instruments. Raw materials of the highest grade are here fashioned with skill and care into finished Wahl Products—the world's leading writing tools. Even the precious metal parts used in making Wahl Pens and Eversharps are made here in our own tubing plant—Eversharp leads, too, are made in this building.

This factory has a daily capacity of 50,000 pencils, 8,000 pens and 1,300,000 sticks of lead.

The entire resources of this large, substantial organization are behind every Wahl Product you sell.

Perfected Wahl Ever- sharp Features

The Rifled Tip Perfected

EVERSHARP'S rifled tip, the patented invention which first made a good mechanical pencil possible, has now been perfected! Tiny relief spaces between the lead-gripping teeth positively prevent clogging or jamming. Still the lead is held firmly at the point; no slipping; no wobbling; no breaking inside the pencil.

Extra Leads Accessible Immediately

THE new side-opening lead magazine enables the user to draw a new lead almost instantly. The amount of reserve lead can always be seen. This feature gives new convenience and new speed of operation to Eversharp.

Loads in an Instant

THE drawing at the left shows the trigger which releases plunger when lead is used up. One pull—insert lead—one push—a turn. That's all. Reloading requires only a very few seconds.

Perfected Wahl Ever- sharp Features

Automatic Lead Index

A very useful feature. To know the length of lead in Ever-sharp just pull the cap straight out and notice the distance between A and B, as shown. This distance equals the length of lead remaining in feed chamber ready for use.

Stronger, Better Clip

THE pocket clip on the New Eversharp is made stronger by a different construction which adds to its appearance. Even if accident break the clip, a new one can be inserted in a few moments.

Replace Worn-out Eraser

THE construction of the New Eversharp permits the eraser to be replaced by a new one. It cannot come out in use, yet it can be changed in a few seconds.

Every Part Replaceable

THE New Perfected Wahl Ever-sharp can be completely taken apart by unscrewing the tip and pulling out the mechanism. All parts are interchangeable and replaceable. Anyone can replace any part in a few seconds.

RED TOP EVERSHARP LEADS

Eversharp leads are made of the highest grade of domestic and imported graphites, clays and waxes and are guaranteed to write easily and smoothly. They are the finest leads obtainable, both for strength and writing quality and should always be used in Eversharp Pencils.

Made in the following grades and colors (standard Eversharp diameter):

- Black (Seven Grades)
 - 2B —Extra soft
 - B —Soft
 - HB—Medium soft
 - F —Firm
 - H —Medium hard
 - 2H—Hard
 - 4H—Very hard
- Purple Copying
- Red
- Blue
- Green
- Yellow

Eversharp leads are packed in Red Top containers as follows:

- 12 leads in one red-top metal tube (black in oblong tubes; colors in round tubes).
- 12 metal tubes in one cardboard box; 1 gross sticks in all. See illustration at top of page.
- 144 leads in sliding box, for office use (see illustration at left center of page).

EVERSHARP CHECKING LEADS

For use in Eversharp checking and executive pencils listed on page 23. Accurately made of finest materials. Furnished in two grades: No. 1, medium soft, and No. 2, extra soft. The No. 2 grade can be used for writing on glass, china and other smooth or glazed surfaces. Both grades made in five colors: black, blue, red, yellow and green.

Indelible checking leads, which write black and copy purple, are furnished in the No. 1 grade (medium soft) only. Checking leads are packed six leads in sliding cardboard box, as shown.

EVERSHARP ERASERS

(Not Illustrated)

Made of fine rubber to fit Eversharp pencils. One box of 12 erasers furnished free with each dozen steel tubes of black Red Top leads of standard (thin) Eversharp diameter. Extra erasers may be ordered separately if desired. When ordering specify whether erasers are wanted for regular, miniature or Commercial Eversharp.

EVERSHARP LEAD COUNTER DISPLAY ASSORTMENTS

The retail sale of Eversharp leads has been materially increased by the use of these handsomely colored metal lead display stands. Every store can use one of these busy silent salesmen. An Eversharp display stand on your counter is a constant reminder to your customers and serves as an invitation to them to reload their Eversharp. These stands are very substantially built and will remain attractive for many years.

Eversharp lead stands are made in two sizes and are furnished only with standard assortments of Eversharp leads as follows:

Telegraph
Word

Caesg LEAD ASSORTMENT No. 9—Small size assortment. Contains one dozen tubes each of grades B, HB and F black Eversharp leads, and ½ dozen tubes each of purple copying, Eversharp red, Eversharp blue and Eversharp green leads. Contains three dozen erasers; no checking leads included. Small size display stand, shown at top of page furnished with this assortment.

Telegraph
Word

Caepd LEAD ASSORTMENT No.

8—Our largest and most complete assortment. Contains 1 dozen tubes of each grade of black leads (of regular size), 1 dozen purple copying, 1 dozen Eversharp red, ½ dozen each Eversharp blue and Eversharp green, six boxes (assorted) checking leads and 7 dozen erasers. Total of 10½ dozen boxes of leads. Large size display stand illustrated at right furnished with this assortment.

EVERSHARP

EVERSHARP WITH ENAMELED EMBLEMS

Orders for silver plated, sterling and gold filled Eversharps bearing emblems of any of the following organizations can be filled from stock:

Blue Lodge
Kiwanis

Rotary
Shriner

Elk
K. of C.

M. W. A.
K. P.

These emblems are beautifully enameled *in full colors* on top of pencil cap.

Quotations on Eversharps with emblems, other than those mentioned above, furnished on request.

The Pen of Today—and Tomorrow

THE Wahl Metal Pen is as far ahead of old-fashioned fountain pens as the New Perfected Wahl Eversharp is ahead of the clutch pencil of grandfather's day.

Its barrel is made of gold or silver—age-enduring metals that defy breaking or wearing out. The metal barrel, on account of its thin walls, permits the use of a much larger ink sac than is possible in any rubber-barrel pen of like diameter. This means greatly increased ink capacity and less frequent filling.

Gold and silver are the ideal materials for such an intimate personal object as a fountain pen. A Wahl Metal Pen peeping from pocket or purse is indicative of the good taste and refinement of the user. It is the pen for everyday use and a lifetime of hard, practical service.

Notice the simple, sturdy, sensible construction of the Wahl Pen in the illustration at the right. There are no frills about it—just the substantial materials and solid construction that a really fine writing pen must have.

The many styles and sizes of the Wahl Pen are shown on the following pages. Every Wahl Metal Pen is engine-turned or engraved in a design to match a New Perfected Wahl Eversharp pencil. Every Eversharp owner should have one of these fine pens to match. A matched pen-and-pencil set, made by Wahl, is the finest complete writing outfit that money can buy.

Every Wahl Pen can be furnished in a wide variety of nibs as shown on pages 54 and 55.

Built for Those Who Want the Best

MILLIONS of people prefer a black rubber fountain pen to any other writing instrument. To meet this large, steady demand we have built a complete line of rubber pens of the highest quality.

The following pages show many styles and sizes of black rubber Wahl Pens in chased and engine-turned finishes. So great has been the popular approval of our new engine-turned models that we have had to greatly increase our factory capacity on these fast selling numbers.

Every part of every Wahl Rubber Pen is made by highly skilled workmen from high grade materials. Every pen is subjected to many rigid inspections before it reaches your store.

The Wahl Company has steadfastly refused to sacrifice a single iota of quality on the altar of lower price and longer profit. It is our firm belief that good selling demands honest merchandise, honestly made.

Each Wahl nib is of generous size and weight, and is tipped with the best grade of osmiridium, a metal compound so precious that many manufacturers reserve it for use on only their higher priced pen points. This point is very carefully smoothed and polished, to insure a smooth-gliding writing surface at the writer's every stroke.

The Wahl comb feed, which holds ink as a comb holds water, controls the ink flow at all writing speeds, and insures writing the instant the pen touches the paper. This makes shaking and coaxing the pen unnecessary.

An airtight chamber inside the pen cap prevents leaking or "sweating" as well as keeping the point moist for instant writing.

Wahl Pens, in rubber as well as in metal, can be fitted with any of the wide variety of nibs pictured on pages 54 and 55. This wide choice of nibs, as well as the large assortment of barrel sizes and finishes, makes it possible to fill exactly the individual requirements of every man and woman who writes.

WE believe that the Wahl Signature Pen will please a greater number of fountain pen users than any pen ever placed on the market. Its nib is of a special weight and has a firm point, which is, however, very carefully ground and extremely smooth in its writing qualities. It writes as nearly like a pencil as it is possible for a fountain pen to do. The Signature Pen is made in three sizes—ladies', regular and oversize—all of the same high quality. Engine-turned in the beautiful Dart design—and equipped with gold filled roller clip, filling lever and cap band—the Signature Pen is sure to appeal to those who want a superfine writing instrument. All sizes hold a large quantity of ink.
